

Geocoded Dataset License

Get access to the raw geocoded data behind TeleGeography's signature maps, delivered via AWS S3 or secure FTP.

"Could I get access to your map data?" We get this question a lot.

The data underlying TeleGeography's interactive maps is available via an annual license.

Delivering the Data

Our map data is delivered as a JSON API—which includes GeoJSON and JSON files—through Amazon Simple Storage Service (Amazon S3). We can also make a secure FTP work.

Our team uploads the API as a zip file with a timestamped filename. You'll permit our Amazon account to upload files to the S3 bucket (we can guide you through this process). Moving forward, we will automatically upload to your S3 bucket every time we make an update to the map.

JSON API? S3 Bucket? I'm not following.

That's okay. That probably means you're not a visual designer or data engineer. These are terms of art that outline the specific types of files we share, how we share them, and how we ensure you receive updates to our datasets, which happen frequently.

If you don't have anyone on your team with experience using these files types, we can walk you through related research and custom map services that might be a better match for your project.

Available Map Data

Submarine Cable Map

The [Submarine Cable Map](#) is famous for a reason. No other resource comes close to matching TeleGeography's accuracy visualizing the world's major submarine cable systems and landing stations. This dataset includes cable system name, country, planning status, RFS date, cable system length, ownership, landing points, and more.

Internet Exchange Map

Dataset includes internet exchanges at the building level.

Data Center Research Map

Dataset includes data center sites at the building level.

Cloud Infrastructure Map

This dataset includes all cloud regions and on-ramp locations for content service providers, cloud exchanges and on-ramp locations for data center operators, and WAN services for network service providers, all at the metro area level.

Samples

Purchasing

Licenses

If you wish to license our data for commercial purposes, access is sold as an annual license. Licenses for multiple datasets can be bundled.
